Company

Dynamic Abutment® Solutions is dedicated to resolving your problems arising from unfavourable placement of implants. Our R&D&I centre is committed to resolving these issues with the aim of improving the aesthetics and functionality of the prosthesis.

You tell us what you need and we listen, adapting and creating you new products to help you stay at the cutting edge of dental technology. This dedication to innovation has led us to develop and bring to market products such as the Dynamic TiBase® to help you create angled channels for your CAD-CAM structures. The system comprises of the Dynamic TiBase®, the Dynamic screw-screwdriver set, scanbodies and digital libraries for all the main CAD software on the market.

This catalogue features all of our new technological developments in the digital design field. This provides you with a wide portfolio of products, developed for you as a complete CAD-CAM system, with all the digital resources you'll need to easily resolve complications in a CAD-CAM environment. The Dynamic TiBase® system provides you with a simple solution for correcting angles up to 30°.

All technologies used to create angulated solutions, from the most traditional ones to the latest digital techniques, have been developed and patented by our R&D&I centre according the OWN ANGULATED TECHNOLOGY programme. This guarantees the ideal treatment in the elaboration of angled dental prosthesis.

Dynamic Abutment® Solutions is devoted to developing quality, innovative products in response to the needs of the dental technology sector.

DYNAMIC ABUTMENT® SOLUTIONS

RESEARCH & DEVELOPMENT

Research and innovation in prosthetics solutions are Dynamic Abutment® Solutions' hallmark and enable us to keep us being the leader in angled systems. The proximity to the professionals' needs and the innovative philosophy of our brand allow our technical team to be at the cutting edge of the sector. When developing the product, we give priority to the output of our product, its ease of use and its improvement regarding aesthetic result.

QUALITY CENTER

Our Quality Center guarantees that all our products fulfill the highest quality levels just as the valid sanitary regulations. It has the latest technologies regarding control and measuring as well as physicochemical treatments of our products. It has an ISO-8 clean room.

INTERNATIONAL CUSTOMER SERVICE

Our international customer service offers immediate answers to your queries and needs. The international team is focused on projecting and establishing our products and comprehensive services all over the world. Nowadays, we are present in more than 30 countries' markets.

DYNAMIC SYSTEM FOR MILLING STRUCTURES

The Screwdriver set of 3.0 Dynamic Abutment® System is used in those cases in which rectification of the entry of the screw due to an unfavorable position of the implants is necessary, improving the functionality and aesthetics of the milled prosthesis.

Dynamic Screwdriver

Screwdriver with hexabular head, exclusively to the 3.0 Dynamic Abutment® system; lengths: 18, 24, 32mm. Our screwdriver has a contra-angle connection to make it easier to use with a dynamometer or manual ratchet, with the corresponding adaptors or handles.

Dynamic Screws

They cover all the tread metrics available on the market. They are used with the 3.0 Dynamic Abutment®, the 3.0 Dynamic TiBase® or milled structures with an angled screw channel of up to 30°. There are several lengths for each metric to ease adaptation to the structures. All of them are made of grade 5 titanium

All screws are perfectly identified with their batch and reference numbers, which allow each and every screw to be traced and recorded in the patient's card and in the clinical or laboratory records. Only the 3.0 dynamic screwdriver must be used to install them.

SECURITY & TRACEABILITY

Dynamic Abutment® Solutions manufactures the “3.0 Dynamic System” range of products, which include the Dynamic Abutment®, the dynamic screw and screwdriver and the Dynamic TiBase®. These are all exclusive and **patented products**. All of them are manufactured under very strict quality guidelines.

With the 3.0 Dynamic System, we provide a card for the patient and labels for the laboratory and the clinic to identify the position in which our system is located. It is extremely important that this information is registered on the patient's record for future repositioning and to know it is necessary to use the screwdriver or the Dynamic System to insert or remove the prosthesis and avoid possible future problems. We exercise complete control over the traceability of our products to fulfil the current health legislation. This helps repositioning the material and inform about the importance of using the appropriate tools when handling the Dynamic System components.

Exclusivity

All of our products are marked during the manufacturing process to ensure the exclusivity of each piece and control traceability.

This logo is exclusive to Dynamic Abutment® Solutions and guarantees the products are original and have successfully achieved the highest quality standards in our Quality Center.

Card for the patient

Identifying labels

3.0 DYNAMIC TIBASE®

Technology

To easily solve the common problem of unfavourable implant placement and, in turn, vastly improving the aesthetics of your CAD-CAM structures made from zirconium, metal and PMMA, Dynamic Abutment® Solutions have created Gold Anodized Grade 5 TiBases®. Because the Dynamic TiBase® have been designed to work with the screw-screwdriver set of the 3.0 Dynamic Abutment® system, you can easily correct angles up to 30° and achieve a screw-retained prosthesis even if the implants have been placed inaccurately.

Double height with a side cut that allows the entrance of the angled screw and screwdriver.

Exterior retentions that ensure a good cement grip

Precision machined up to +/- 5 microns

Narrow platform maximum angulation 25°
Regular/Wide platform maximum angulation 30°

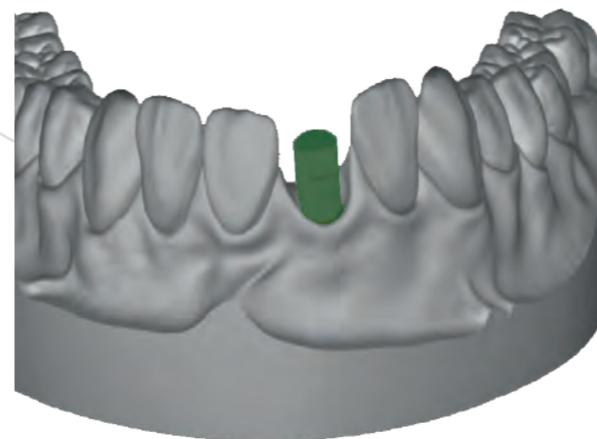

SCANBODY PEEK FOR 3.0 DYNAMIC TIBASE®

Ref. SBIND3MURP/PK

Ref. SBIND3RP/PK

Ref. SBIND3NP/PK

Ref. SBIND30CRP/PK

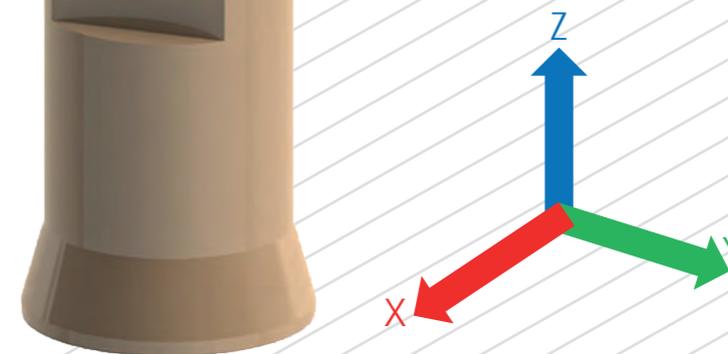

Detect the position and orientation of the respective dental implant or analog in CAD-CAM scanning procedures. Only four scanbodies for more than 200 compatibilities.

Perfect fit

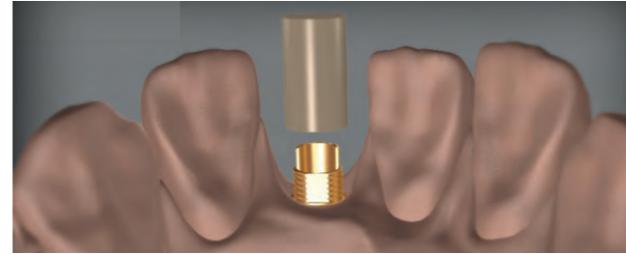

Z Position

XY Orientation

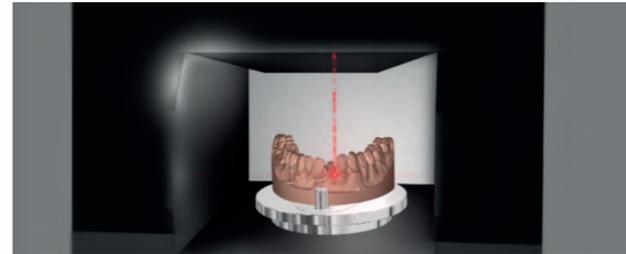

SCANNING PROCESS AND CAD SOFTWARE

Fix and adjust the scanbody to the 3.0 Dynamic TiBase®, avoiding any rotation thanks to its design.

Then, proceed with the Scanbody scanning and the position of the implant is precisely detected.

Thanks to the versatility of the 3.0 Dynamic TiBase®, extremely aesthetic restorations may be achieved through the angulation of the screw entry, which goes from 0° up to 30° using the screw and screwdriver 3.0 Dynamic Abutment® System.

Technical Assistance

Our International Customer Service Department (Tel. + 34 973 289580) provides immediate attention for any query.

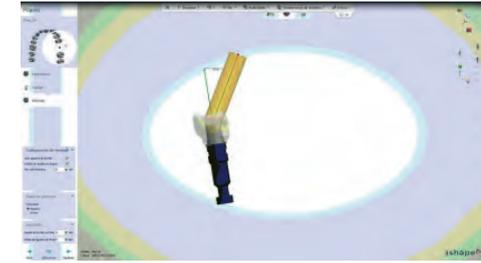

SOFTWARE CAD

CAD/CAM technology now represents the most innovative approaching in the fixed prostheses development and is a progress over conventional dentistry, allowing extremely precise design and high quality restorations.

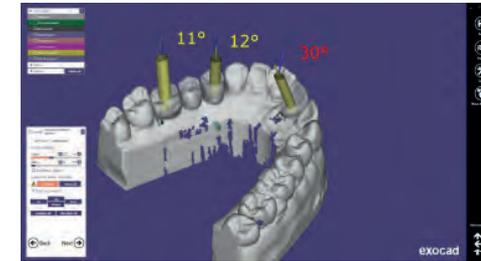

Dynamic TiBases® are a technological contribution to the digital treatment for the angled systems development using CAD/CAM: the Dynamic system includes the Dynamic TiBase®, the dynamic screw-screwdriver set, scanbodies and digital libraries available for the main CAD softwares on the market: Exocad, 3Shape, Dentalwings, Imetric and EGS.

DYNAMIC SCREWDRIVER

Screwdriver with hexalobular head, exclusively to the 3.0 Dynamic Abutment® system; lengths: 18, 24, 32mm. Our screwdriver has a contra-angle connection to make it easier to use with a dynamometer or manual ratchet, with the corresponding adaptors or handles.

HEXALOBULAR 1.70 mm
DSPDCLH-18: PD 18mm

HEXALOBULAR 1.70 mm
DSPDCLH-24: PD 24mm

HEXALOBULAR 1.70 mm
DSPDCLH-32: PD 32mm

STRAIGHT SCREWS

They cover all the thread metrics available on the market. We have several lengths for each metric to make the adaptation to the milled structures easier. Made of grade 5 Titanium.

ANALOGS

Stainless steel implant analog. It reproduces the implant connection

COMPLEMENTS

Manual handle

Made of stainless steel. They are used to connect screwdriver bits with the contra-angle connection

Large manual handle for laboratory

Ref. MNLB
Ideal to manipulate models in the laboratory. Length 55.65mm.

Manual handle for clinic

Ref. MNCL80
Clinic handle: used to position the prosthesis in the mouth prior to torque control in the clinic. Length: 15.65mm.

Universal manual torque wrench prosthetic

Ref. CCUNI

Torque wrench. 4mm square connection. Torque 10-35N.c

Manual torque wrench adapter prosthetic

Piece to connect the screwdriver with contra-angle connection to the torque wrench.

Universal Manual torque wrench adapter

Ref. MNADPCA
4mm Square connection

Straumann Manual torque wrench adapter

Ref. SPACC-STR
Straumann connection

TALLADIUM GUARANTEE

TERMS AND CONDITIONS

These guarantee terms and conditions (“T&C”) cover the entire range of Talladium products (“Products”), manufactured by TALLADIUM ESPAÑA S.L. and distributed by Geoda Medical S.L. or official dealers. The guarantee described in these T&C is exclusively in benefit of the clinician (“Clinician”) and of the dental technician (“Technician”) and not for the benefit of third parties or institutions, including patients.

GUARANTEE PERIOD

TALLADIUM ESPAÑA S.L. offers a lifelong guarantee for its entire range of products starting from the date of issue of the invoice.

GUARANTEE SCOPE

Subject to the limitations and exceptions described in these T&C, TALLADIUM ESPAÑA S.L. will offer the following benefits:

QUALITY: If there are defects in the materials or in the manufacturing of the Product, TALLADIUM ESPAÑA S.L. will replace the Product with no additional cost.

SAFETY: If, having complied with all the product indications, the prosthesis should have to be made again, due to a fault in the Dynamic Abutment® or Dynamic Titanium Base® system, TALLADIUM ESPAÑA S.L. will replace the abutments and screws necessary to remake the prosthesis, as well as the costs derived from its manufacturing.

In case of having used our products and having complied with all the product indications, the implants suffer any damage, TALLADIUM ESPAÑA S.L. will pay the cost of the implants. This coverage will only be valid during the first 6 months after the collocation of the prosthesis which includes our products.

CLAIM REQUIREMENTS AND PROCEDURE

To receive the benefits indicated in these T&C, the treating Clinician must satisfy the following requirements:

- The claim must be notified to TALLADIUM ESPAÑA S.L. within (30) days since the date the claimed defect was detected.
- This requires that the Clinician or Technician must contact the customer service department by telephone or by e-mail to make the claim.
- A claim form will be completed, which, together with a document or report which justifies the faulty Product and the faulty Product itself, will be sent by the customer to TALLADIUM ESPAÑA S.L. offices, within the previously indicated period.
- Clinicians or Technicians presenting a claim in agreement with these T&C must be up to date in any payments owing to TALLADIUM ESPAÑA S.L. or to any of its subsidiaries, at the time when the claim form is presented.
- All the use procedures of our Products must be carried out in agreement with the instructions of TALLADIUM ESPAÑA S.L. as well as in accordance with commonly accepted dentistry practices.
- The expenses derived from this procedure will be assumed by the customer. The return shipping costs will be assumed by TALLADIUM ESPAÑA S.L. in all those cases covered by these T&C.

Regardless of the guarantee rights, claims should be notified as soon as possible in order to comply with regulatory requirements.

GENERAL LIMITATIONS OF THIS GUARANTEE

With the exception of the guarantee described in these T&C, neither TALLADIUM ESPAÑA S.L. nor its representatives, nor third parties manufacturing or distributing the Products, represent or offer a guarantee, agreement or any other express or implicit, oral or written, commitment, with respect to the Products (without limitation), including guarantees involved in the marketing, durability or suitability for individual uses or purposes.

In addition and within the maximum extent permitted by the relative law, TALLADIUM ESPAÑA S.L. rejects (on its own behalf, and on behalf of its representatives and third parties that manufacture or distribute Products) any responsibility with respect to any direct or indirect damage caused, which may result from or be a consequence of the design, composition of the dental prosthesis into which the Products are integrated.

GUARANTEE EXCLUSIONS

TALLADIUM ESPAÑA S.L. limits this guarantee to:

- Transformed abutments that form part of the dental prosthesis. But not the screws used to anchor them.
- Problems derived from the use of laboratory screws for the definite fixation of the prosthesis. TALLADIUM ESPAÑA S.L. has clinical screws that satisfy that function.
- Clinical screws that have been in the mouth for more than 2 years, as it is understood that the patient has to have annual check-ups with the subsequent change of screws.
- The fault is due to normal wear and tear.

AMENDMENT OR SUSPENSION OF THE GUARANTEE

TALLADIUM ESPAÑA S.L. reserves the right to amend or withdraw these T&C at any time and without prior notification. Any modification or suspension shall not affect products already placed in patients.
